

## For Immediate Release

## Presence at EFEE Conference on Explosives & Blasting in Moscow, 2013, booth# 18-5

### Valéron Strength Films, Essen, Belgium – July 8<sup>th</sup>, 2013

Valéron Strength Films® will be present at the upcoming 7<sup>th</sup> World Conference on Explosives & Blasting in Moscow from September 15<sup>th</sup> - 17<sup>th</sup> 2013 at **booth #18-5** in the Foyer Hall at the Cosmos Hotel Moscow.

Valéron® film is used in high impact resistant explosive cartridges for form, fill and seal (FFS) packaging of emulsion or water gel explosives. Valéron® provides low elongation that assists in the filling and production of emulsion explosives at high fill temps without creating a baggy film on the finished chub. It also provides excellent tear resistance which protects the cartridge from puncture during installation in a bore hole.

Valéron® films are cross-laminated multi-layer structures offering a thin, flexible film with more balanced strength than any other substrate. This allows you to do more with less.

If you would like to know more about Valéron Strength Films, please feel free to contact us or come and see us at our **booth #18-5** in the Foyer Hall.
